

model motoring **in HO scale**

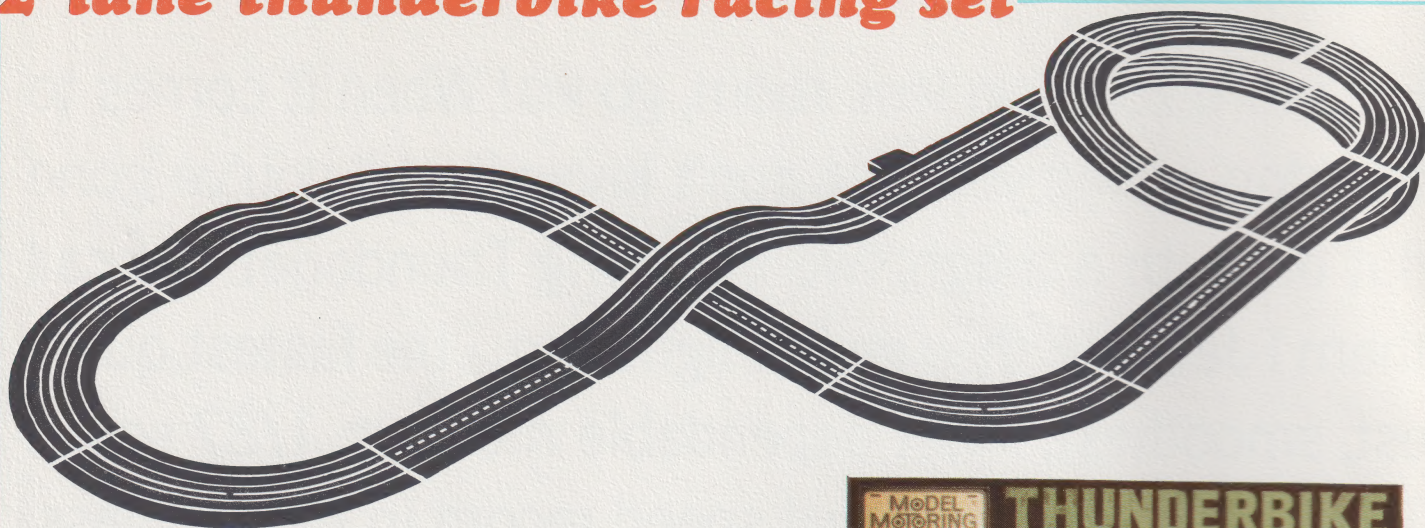

1967

For more zoom in less room, go HO! When it comes to tabletop racing you just don't know it—till you've gone flat out with a tough, two inch long Thunderjet. We call them T-Jets, but they go like lightning...the fastest, quietest, smoothest, most dependable motor in 1/87 scale! T-Jets hold every national speed record in the HO class. And man...roaring along at over 500 scale miles per hour, equipment counts as much as skill. That's why only Model Motoring cars and equipment are eligible for use in the annual Ford-Aurora Grand National Championships. AURORA pioneered model car racing in this country and still leads them all...with more cars, more sets and more accessories than all other manufacturers put together! □ AURORA has a set suited to every budget, and enough action accessories to duplicate any real racing circuit. So look for the package with the yellow "license plate", to be sure that you're getting authentic Model Motoring; to be sure you're using the same equipment endorsed by the world-famous racing champ Stirling Moss. If he can do it... so can you. In scale. Only with Model Motoring.

2 lane thunderbike racing set

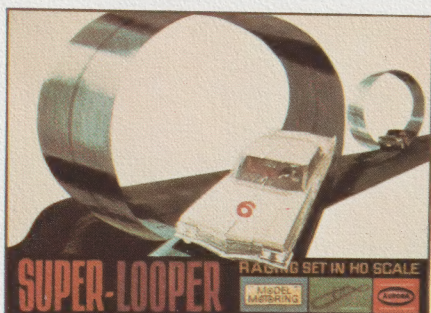

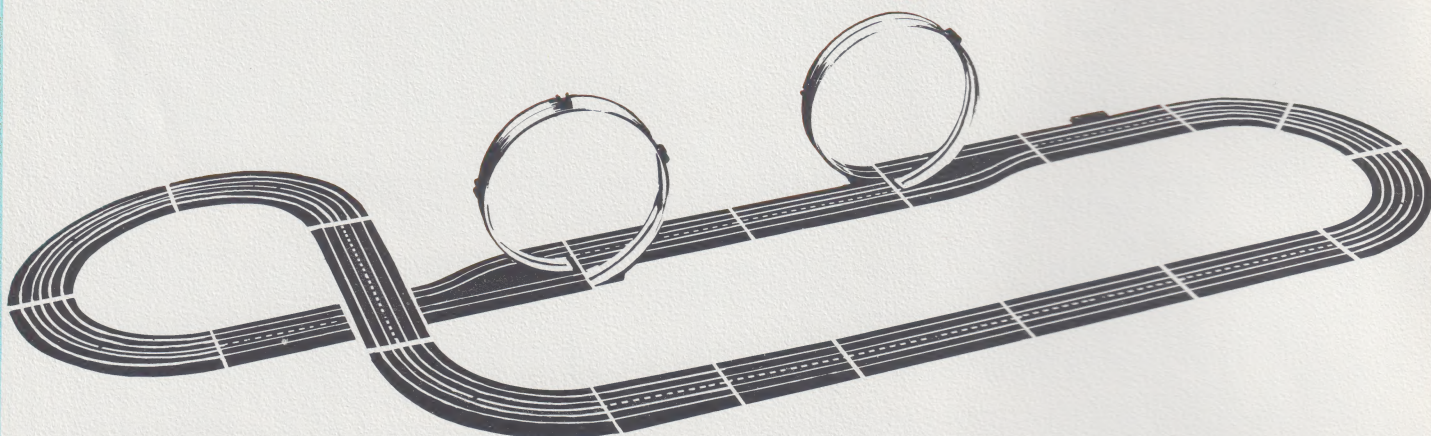

No. 1319 **THUNDERBIKE 2-LANE RACING SET**.
